## PROJECT EXPERIENCE

### Health Wave Medical Application

- Developed a healthcare management app using **Java, JavaScript, HTML, CSS, Spring Boot, JPA, React, MySQL, and REST**.
- Enabled patient management, doctor communication, appointment scheduling, and access to medical history, enhancing healthcare efficiency and communication.
- View project -  **Bē**

### Fresh Cart

- Developed a responsive ecommerce web app for groceries using **HTML, CSS, JavaScript, React, Spring Boot and MySQL**.
- Implemented secure authentication, streamlined checkout, real-time order updates, and automated email receipts with **EmailJS**.
- View project -  **Bē**

### To-Do List App

- Built a responsive task management app using **HTML, CSS, JavaScript, and React**.
- Features include adding, updating, deleting, and marking tasks as done.
- Ensures a seamless experience across all devices.
- View project -  **Bē**

### User Management System

- Developed a user management system using **Node.js, MongoDB, and EJS** for dynamic HTML generation.
- Features efficient CRUD operations for user data with a responsive design.
- View project -  **Bē**

### Payroll and Leave Management System

- Designed and developed a system for automating salary calculations and leave tracking using **MySQL, NetBeans, and Java**.
- Enhanced organizational efficiency and accuracy in payroll and time-off management.
- View project -  **Bē**

### NIBM Grading Hub

- Developed a grade management system using **C#, .NET Framework, MS SQL Server, and Visual Studio**.
- Features include inputting student marks, grade computation, and organized grade display, ensuring a seamless user experience.
- View project -  **Bē**
